

Succulent Beauty Kalanchoe

Longlasting, Colorful

AVAILABILITY

YEAR-ROUND

THE PLANT ORIGINATES FROM TROPICAL AFRICA, ASIA AND MADAGASCAR.

HOW DO YOU PRONOUNCE KALANCHOE?

There are many ways:

KA-luhn-**KO**-e
kuh-LANG-ko-e
KAL-uhn-cho
kuh-LAN-cho

or if you are Dutch:

kuh-LAN-Cho-Way

Kalanchoe is the latest breed of flower to go from the potted world, to the cut flower world. Botanically classified as succulents, these colorful and charming flowers are sure to delight.

FARM FRESH: Kalanchoe thrive in the moderate coastal climate of Sun Valley's Oxnard, California farm where we are

perfecting our growing technique with these beauties. Our Kalanchoe are producing vibrant and large bloom clusters on tall stems in our glass greenhouse.

LASTING: Outstanding 3 week vase life.

BUNCHES: Standard bunch size: 5 stems.

CARE & HANDLING: Do not refrigerate. These floral succulents do best in the temperatures that we humans prefer. Place into a clean container with fresh, tepid water with fresh flower food solution. Remove any foliage below the water. Keep in cool location out of direct sunlight and drafts. Replenish water as needed.
